INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/006800

Box	No. I	Basis of the report				
1.	With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.					
	This which	report is based on translations from the original language h is the language of a translation furnished for the purpointernational search (Rule 12.3 and 23.1(b)) publication of the international application (Rule 12.4)	ses of:			
		international preliminary examination (Rule 55.2 and/o				
2.	With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report): the international application as originally filed/furnished the description:					
	page	s <u>1-15</u>		as originally filed/furnished		
	page	s*	received by this Authority on			
	page	·s*	received by this Authority on			
	M the	elaims:				
Ì	nos.	2–23		as originally filed/furnished		
	nos.		·	vith any statement) under Article 19		
	nos.		ž	3.02.2005 With letter		
	nos.					
		- 				
		drawings:		as originally filed/furnished

3.	The	amendments have resulted in the cancellation of:				
		the description, pages				
1		the claims, nos.				
		the drawings, sheets/figs				
		the sequence listing (specify):				
		any table(s) related to sequence listing (specify):				
4.	Thi the	s report has been established as if (some of) the amen y have been considered to go beyond the disclosure as f	dments annexed to this report and liled, as indicated in the Supplementa	isted below had not been made, since at Box (Rule 70.2(c)).		
		the description, pages				
		the claims, nos.				
		the drawings, sheets/figs				
		the sequence listing (specify):				
*	If item 4	applies, some or all of those sheets may be marked "suj	perseded."			

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/006800

Box	Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1.	Statement					
	Novelty (N)	Claims 1-23	YES			
		Claims				
	Inventive step (IS)	Claims 1-23	YES			
		Claims				
	Industrial applicability (IA)	Claims 1-23	YES			
		Claims				
2.	Citations and explanations (Rule	70.7)	<u>.</u>			
2.	•					
	1) Reference is made to the following documents:					
	D1: US-A	-6 033 880 (NOREIKS RICHARD W ET AL)				
		rch 2000 (2000-03-07)				
	D2: DE 101 44 925 A (FRAUNHOFER GES FORSCHUNG)					
	27 March 2003 (2003-03-27)					
	21 Match 2003 (2003 03 21)					
	2) Document D1 is considered the prior art closest to					
	the subject matter of the new claim 1 and					
ĺ	discloses (the references between parentheses					
	refer to that document):					
	sample holding arrangement, in particular for the					
	cryopreservation of at least one sample, said					
	arrangement comprising: a bundle consisting of a					
	number of tubular, flexible sample chambers (D1,					
	figure 20), feature 228), and a retaining device,				
	to which	the bundle of sample chambers is				
	connecte	d, the retaining device being arranged in				
	the long	itudinal direction of the bundle (D1,				
	figure 20, features 232 and 234).					
	The subj	ect matter of claim 1 thus differs from D	1			

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

in that:

the retaining device has a plurality of holding frames which comprise frame parts for the suspended arrangement of the sample chambers.

The subject matter of claim 1 is thus novel (PCT Article 33(2)).

The solution to the problem as proposed in claim 1 of the present application involves an inventive step (PCT Article 33(3)) for the following reasons: document D1 represents simply technical background for implementing a PCR procedure, but does not indicate or suggest any design for a sample holding device with sample chambers.

Claims 2-17 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.

Claim 18 is also novel and involves an inventive step, mutatis mutandis.

Claims 19-23 are dependent on claim 18 and therefore likewise meet the PCT requirements for novelty and inventive step.

2.1) D2 also discloses a sample holding arrangement, in particular for the cryopreservation of at least one sample, said arrangement comprising: a bundle consisting of a number of tubular, flexible sample chambers (D2, figure 6, feature 615), and a

PCT/EP2004/006800

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

retaining device, to which the bundle of sample chambers is connected, the retaining device for the suspended arrangement of the sample chambers being arranged in the longitudinal direction of the bundle (D1, figure 6, feature 627).

The subject matter of claim 1 thus differs from D2 in that:

the holding device has a <u>plurality</u> of holding frames.

The subject matter of claim 1 is thus novel (PCT Article 33(2)).

The current invention can therefore be considered to address the problem of improving ease of handling when loading the samples.

The solution to this problem as proposed in claim 1 of the present application involves an inventive step (PCT Article 33(3)) for the following reasons: the plurality of holding frames improves ease of handling.
